

# Message Class 0008 - EntireX ACI - Security Error

The following messages are returned by EntireX Broker after a security violation is detected by EntireX Security; Lightweight USRSEC; or the sample - that is, user-defined - security module USRSEC. This message class indicates that the security system rejected the intended action. The specific error is given as the message number in the last four bytes of the message code. The messages have the format:

0008nnnn

where 0008 is the message class, and

nnnn are the message numbers grouped as follows:

- 0001-0999: EntireX Security
- 1000-1999: Lightweight USRSEC
- 2000-2999: Sample security module USRSEC

This document covers the following topics:

- EntireX Security Messages
- Security Return Code
- Messages for Sample Security Module USRSEC

## EntireX Security Messages

### Overview of Messages

00080001	00080002	00080003	00080004	00080005	00080006
00080007	00080008	00080009	00080010	00080011	00080012
00080013	00080024	00080043	00080044	00080045	00080048
00080049	00080254	00080255	00080350	00080351	00080352
00080353	00080400	00080401	00080402	00080404	00080405
00080406	00080407	00080408	00080409	00080604	

**00080001**      **Access denied ext. security not active**

**Explanation**      Security system not active: no authorization could be determined. Access denied.

**Action**              Contact administrator of SAF security system.

**00080002**              **Access denied user profile not defined**

**Explanation**              User profile not defined to security system: access denied.

**00080003            Access denied password not authorized**

**Explanation**            User has supplied incorrect password: access denied.

**00080004            Access denied password expired**

**Explanation**            User's password has expired.

**Action**                 Supply existing and new password. Successful access will result in password change.

**00080005            Access denied, new password invalid**

**Explanation**            User has supplied an invalid new password: access denied.

**Action**                 Consult your site-specific rules governing passwords.

**00080006            Access denied, rejected by inst. exit**

**Explanation**            User access rejected by installation exit: access denied.

**Action**                 Determine whether your site specifies security rules.

**00080007            Access denied, user ID revoked**

**Explanation**            User's access has been revoked - possible because of too many unsuccessful attempts: access denied.

**Action**                 Request user ID to be reset.

**00080008            Access denied at this time date**

**Explanation**            User is denied access at this time/date: access denied.

**Action**                 Contact security administrator to ensure that correct privileges are defined.

**00080009            Access denied resource not allowed**

**Explanation**            User is not permitted access to this resource: access denied.

**Action**                 Contact security administrator to ensure that correct privileges are defined.

**00080010      Access denied resource not defined**

**Explanation**      Resource not defined to security system: access denied.

**Action**              Contact security administrator to ensure that correct privileges are defined.

**00080011      Access denied, IP address not allowed**

**Explanation**      Users are not permitted to execute the application at the IP address where they is currently located. This applies only where IP address authorization is enabled.

**Action**              Contact security administrator to ensure that correct privileges are defined.

**00080012      Access denied, IP address not defined**

**Explanation**      The IP address where the user is currently located is not defined to the security system. This applies only where IP address authorization is enabled.

**Action**              Contact security administrator to ensure that correct privileges are defined.

**00080013      Access Denied to application (APPL)**

**Explanation**      The user is not authorized to use the application that was defined with security-specific broker attribute APPLICATION&#8209;NAME. See APPLICATION-NAME under *Broker Attributes*.

**Action**              Ask your security administrator for permission to access the broker.

**00080024      ETBUPRE: Unresolved V-CON**

**Explanation**      The security function in the Broker stub was unable to locate the SAFCFG module for processing security settings.

**Action**              Assemble and link the SAFCFG module as described in the z/OS installation documentation. See *Installing EntireX Security for Applications using Broker Stubs*.

**00080043                      Unable to initialize**

**Explanation**                      Internal error occurred.

**Action**                      Contact Software AG support.

**00080044 Invalid ENCRYPTION-LEVEL value**

**Explanation** Application must supply values 0 | 1 | 2 in ACI field ENCRYPTION-LEVEL.

**Action** Correct the application.

**00080045 Invalid CREDENTIALS-TYPE value**

**Explanation** The application has supplied an incorrect value in ACI field CREDENTIALS-TYPE.

**Action** Correct the application.

**00080048 Access denied, invalid credentials**

**Explanation** User credentials are invalid.

**Action** Correct user credentials.

**00080049 Invalid AUTHENTICATION-TYPE value**

**Explanation** The value of this parameter supplied in the Broker attribute file is incorrect.

**Action** Correct attribute file parameter AUTHENTICATION-TYPE.

**00080254 Access denied SAF returns: xxxxxxxx**

**Explanation** SAF returns RACROUTE error codes: SSSSSSSS.

**Action** Determine cause of error using information listed below.

**00080255 Access denied SAF interface error xx(yy)**

**Explanation** Security returns error code xx(yy).

**Action** Inform Software AG support.

**00080350 Bad user ID detected, access denied**

**Explanation** Either the user has not been defined, or the password does not match.

**Action** Verify the specified user ID / password for the LOGON command

**00080351      Access Denied RPC lib/pgm not converted**

**Explanation**      Internal error occurred performing Client RPC Authorization.

**Action**              Contact Software AG support.

**00080352      Access Denied Reconnect requires UID/PWD**

**Explanation**      Application has attempted to transfer control to a different thread, or process, without correctly transferring the necessary values of USER-ID, TOKEN and STOKEN.

**Action**              The application transferring control must make values of USER-ID, TOKEN and STOKEN available to the application which is delegated to continue thread of execution.

**00080353      Access Denied Bad STOKEN: UID/PWD needed**

**Explanation**      Application has not correctly maintained the value of security token (STOKEN) in the EntireX Broker control block structure.

**Action**              The application must maintain the value of STOKEN in order to securely communicate with Broker kernel without sending PASSWORD with each command.

**00080400      Unable to load library exxauthr**

**Explanation**      If EntireX Security is enabled and the default user exit library `usrsec` is used, the additional library `exxauthr` must also be enabled.

**Action**              Check your installation.

**00080401      Service not defined, access denied**

**Explanation**      Access denied by broker attribute setting `AUTHORIZATIONDEFAULT=NO`.

**Action**              Check the broker attribute files and amend the entries for `AUTHORIZATIONRULE` and `AUTHORIZATIONDEFAULT`.

**00080402      User not authorized for this service**

**Explanation**      The user is not authorized to send a request to the specified service.

**Action**              Check the list of defined users for this service (mainframe: EntireX SAF-based Security; UNIX/Windows: System Management Hub Agent "Authorization Rules").

**00080404            Broker Security Server not running**

**Explanation**        The Broker Security Server for BS2000/OSD is not started.

**Action**                Start the Broker Security Server.

**00080405            Broker Security Server not ready**

**Explanation**        EntireX Broker could connect to the EntireX BS2000/OSD Security Server, but found the Server in status inactive.

**Action**                Verify whether the Security Server task started correctly.

**00080406            Broker Security Server timeout**

**Explanation**        The Broker Security Server did not respond.

**Action**                Verify whether the Security Server task started correctly. A Security Server trace may help to identify the problem.

**00080407            Authentication failed**

**Explanation**        Either the user ID is not defined or the password does not match.

**Action**                Supply a valid user ID and password. A Security Server trace may be turned on to identify the exact reason why the authentication failed.

**00080408                            Access denied, invalid credentials**

**Explanation**                            User credentials are invalid.

**Action**                                Correct user credentials.

**00080409            Invalid AUTHENTICATION-TYPE value**

**Explanation**        The value of this parameter supplied in the Broker attribute file is incorrect.

**Action**                Correct attribute file parameter AUTHENTICATION-TYPE.

**00080604 STUB: Snd length too long for encryption**

**Explanation** The Assembler-written stubs support encryption only where the send buffer is less than approximately 32 KB of data. If encryption is requested and the send length is greater than 32 KB, the command cannot be processed by the stub and a response is given.

**Action** Do not specify encryption where the length of the send buffer is greater than 32 KB.

## Security Return Code

ACI error code 00080254 returned to the application indicates an unexpected response from SAF. This information is also shown in the Broker kernel trace when the appropriate trace level settings are applied. This message will contain the following bytes. *SSSSSSSS* in the documentation.

The hexadecimal return/reason code structure contains the following information:

Position within message code	Information content
Byte: 1	SAF return code
Byte: 2	Not used
Byte: 3	Return code from security system, for example RACF
Byte: 4	Reason code from security system, for example RACF

## Messages for Sample Security Module USRSEC

### Overview of Messages

00082004 | 00082008 | 00082012 | 00082016 | 00082020 | 00082024 |  
 00082028 | 00082032 | 00082036 | 00082052 | 00082300 | 00082301 |  
 00082352 | 00082353 | 00082999

**00082004 Invalid Userid/Password combination**

**Explanation** Either the user has not been defined, or the password does not match.

**Action** Verify the specified user ID / password for the LOGON command.

**00082008 Invalid Userid/Password combination**

**Explanation** Either the user has not been defined, or the password does not match.

**Action** Verify the specified user ID / password for the LOGON command.

**00082012 Password expired and no new password**

**Explanation** User's password has expired.

**Action** Supply previous and new password.

**00082016 Invalid new Password**

**Explanation** User has supplied an invalid new password: access denied.

**Action** Consult your site-specific rules governing passwords.

**00082020 Userid not defined to specified group**

**Explanation** User is not permitted access to this resource: access denied.

**Action** Contact security administrator to ensure that correct privileges are defined.

**00082024 Access failed by installation exit**

**Explanation** User access rejected by installation exit: access denied.

**Action** Determine whether your site specifies security rules.

**00082028 System access has been revoked**

**Explanation** User's access has been revoked - possibly because of too many unsuccessful attempts.

**Action** Request user ID to be reset.

**00082032 RACF is not active**

**Explanation** Security system not active: no authorization could be determined. Access denied.

**Action** Contact administrator of SAF security system.

**00082036 Default group access has been revoked**

**Explanation** User's group access has been revoked.

**Action** Contact administrator of SAF security system.

**00082052            Application access is not authorized**

**Explanation**            User does not have authorization to access this application.

**Action**                    Contact administrator of SAF security system.

**00082300            Invalid interface version**

**Explanation**            An invalid version of the security interface was detected.

**Action**                    Contact Software AG support.

**00082301            Invalid interface type**

**Explanation**            An invalid security interface type was detected.

**Action**                    Contact Software AG support.

**00082352            Reconnection rejected**

**Explanation**            An invalid security token was detected during a reconnect attempt.

**Action**                    Reconnection is not possible for this session. Log off and log on again.

**00082353            STOKEN mismatch, LOGOFF/LOGON needed**

**Explanation**            An invalid security token was detected.

**Action**                    Log off and log on again.

**00082999            Work area too small**

**Explanation**            Unable to obtain required storage for security work area.

**Action**                    Check for system storage problems.
