

# Message Class 2013 - Deployment to XML RPC Server

This message class contains messages that can occur when deploying an XMM file to an XML RPC server. They have the following format:

2013nnnn

where 2013 is the message class, and

nnnn is the message number in the range 0000 - 9999

## Overview of Messages

20130001 | 20130002 | 20130005 | 20130007 | 20130010 | 20130011

See *Deployment to XML/SOAP RPC Server and Dynamic Configuration of XML/SOAP RPC Server*.

---

### **20130001      Unknown configuration method**

**Explanation**    Remote configuration is not supported by this version of the XML/SOAP RPC Server.

**Action**            Upgrade to XML/SOAP RPC Server Version 8.1 or later to use this feature.

### **20130002      Invalid Call**

**Explanation**    The deployment message size exceeds the maximum message length.

**Action**            Increase maximum message size in Broker attribute file.

### **20130005              Permission Denied: No write access**

**Explanation**    XML/SOAP RPC Server cannot write files.

**Action**            Modify permission for affected part of file system.

### **20130007              Permission Denied: No modification access**

**Explanation**    XML/SOAP RPC Server cannot modify files.

**Action**            Modify permission for affected part of file system.

**20130010      Error during processing operation (Validation fails)**

**Explanation**    The XMM file contains one or more programs that were previously deployed within another XMM file. Multiple XMM files containing the same IDL program should not be deployed to the same server.

**Action**            Check XMM files to remove conflicts.

**20130011      Disabled Deployment for XML/SOAP RPC Server**

**Explanation**    XML/SOAP RPC Server supports deployment, but it is disabled in server properties.

**Action**            Modify the server properties for enabling deployment.
