EntireX PL/I Wrapper

The EntireX PL/I Wrapper provides access to RPC-based components from PL/I applications. It enables you to develop both client and server applications.

Introduction	Introduction to the PL/I Wrapper.
Using	Step-by-step guide on how to generate interactively and build (write, compile and link) clients and server applications with the PL/I Wrapper. Programming models for batch, CICS and IMS PL/I RPC applications are introduced.
Command-line Mode	Using the PL/I Wrapper in command-line mode.
Mapping	Mapping Software AG IDL data types, groups, arrays and structures to the PL/I programming language.
Writing Applications	A step-by-step guide how to write applications with the PL/I Wrapper and an introduction to further advanced topics.
Examples	Describes the delivered PL/I Wrapper example programs.
Reference	Provides reference material for the PL/I Wrapper.
Tracing	Tracing for the PL/I Wrapper.
