webMethods Mobile Administrator 9.7 Readme

October 2014

This file contains important information you must read before using webMethods Mobile Administrator 9.7. You can find webMethods Mobile Administrator 9.7 user documentation on the Documentation website or the TECHcommunity website. At those locations, you can also find the suite-related information listed below.

webMethods Product Suite Release Notes
webMethods and Intelligent Business Operations System Requirements
webMethods System Cache Specifications
Using the Software AG Installer
Installing webMethods and Intelligent Business Operations Products
Using the Software AG Update Manager (fixes)
Upgrading webMethods and Intelligent Business Operations Products
Security and globalization information

1.0   Critical Information

This section lists the critical issues for the current release that were known when this readme was published. For critical information found later, go to the Knowledge Center on the Empower website.

▪ The Mobile Administrator build node functions incorrectly with the default Ruby for Mac OS X 10.9 (Mavericks).
When running on Mac OS X 10.9 (Mavericks), the Mobile Administrator build node for Mac OS X requires a more recent version of Ruby than the default version that ships with Mac OS X 10.9. The following issue in Ruby affects the Mobile Administrator build node: https://bugs.ruby-lang.org/issues/9592. This issue can result in various symptoms, which includes the build node printing an error to the build log. The error includes a Ruby system stack trace.
To reliably operate the build node, install at least Ruby 2.0.0p481 as the default system Ruby (not using RVM or rbenv). In addition, it is advised to upgrade the ruby gem 'libruby-xml' to at least version 2.7.0. Note that this issue does not affect earlier or later versions of Mac OS X.

2.0   Known Issues

This section lists issues that were known for the current release when this readme was published. For known issues found later, go to the Knowledge Center on the Empower website.

▪ MAD-2338
Deobfuscation does not work for Android crash logs.
You can upload Android crash logs to Mobile Administrator. However, deobfuscation using an uploaded Proguard mapping file does not work. Crash logs from obfuscated Android applications will appear obfuscated.
There is currently no workaround for this issue.

▪ MAD-2323
Crash log policy does not work for Android applications created with Mobile Designer.
The crash log application policy for Android does not work with applications you create using Mobile Designer because of incompatibilities in the Proguard configuration that is provided with Mobile Designer applications.
There is currently no workaround for this issue.

3.0   Usage Notes

This section provides additional information you need to work with the current release of webMethods Mobile Administrator.

▪ Mobile Administrator now supports creating applications to run on the Windows 8 platform. Windows 8 support was added to the existing Windows RT platform support.

4.0   Fixes Included in Each Release

This section lists the fixes that have been included in each release. Go to the Knowledge Center on the Empower website for detailed information about fixes.

Release 9.7

None.

Release 9.6

None.

5.0   Other Resolved Issues

This section lists the issues that were resolved in each release but were not part of the fixes listed in the previous section.

Release 9.7

▪ MAD-2124
Search parameter not being honored in search for applications.
When a search term was entered in the web App Store or the mobile App Store client, the returned list of applications was not filtered according to the search term.
The Mobile Administrator server was updated to correctly filter search results.

Release 9.6

None.

6.0   Documentation Changes

This section describes significant changes to the documentation in each release, such as the addition, relocation, or removal of product guides, online help, chapters, or other major content.

Release 9.7

▪ The document "webMethods Mobile Administrator Installation Supplement" was removed, and its information is now included in the "Installing webMethods and Intelligent Business Operations Products" and "Upgrading webMethods and Intelligent Business Operations Products" guides.

Release 9.6

None.

7.0   Terminology Changes

Release 9.7

None.

Release 9.6

None.

8.0   Added, Removed, Deprecated, or Changed Items

This section lists features, functionality, controls, portlets, properties, or other items that have been added, removed, deprecated, or changed.

Release 9.7

None.

Release 9.6

None.

9.0   Added, Removed, Deprecated, or Changed Built-In Services

Release 9.7

None.

Release 9.6

None.

10.0   Added, Removed, Deprecated, or Changed Parameters

Release 9.7

None.

Release 9.6

None.

11.0 Added, Removed, Deprecated, or Changed APIs

Release 9.7

None.

Release 9.6

None.
