## 1.0 Critical Information

This section lists any critical issues for the current release that were known when this readme was published. For critical information found later, go to the Knowledge Center on the [Empower website](#).

## 2.0 Known Issues

This section lists any issues that were known for the current release when this readme was published. For known issues found later, go to the Knowledge Center on the [Empower website](#).

- WDA-101  
On DB2 RDBMSs, the drop storage command in the Database Component Configurator does not drop the schema.  
If you run the drop storage command for DB2 in the Database Component Configurator, it drops the tablespaces, tables, and views used by the database components, but it does not drop the schema.  
Workaround: Drop the schema manually. For instructions, see the *Installing webMethods and Intelligent Business Operations Products* Guide.
- WDA-86  
Command prompt appears and stays up for the entire time the GUI is open.  
There is currently no workaround for this issue.

## 3.0 Usage Notes

This section provides any additional information you need to work with the current release of this product.

- DB2 supports auto-resizing of tablespaces in DB2 8.2 Fix Pack 9 and later versions only. If you are using DB2 8.2 Fix Pack 9 or a later version, Database Component Configurator creates tablespaces with auto-resize enabled. If you are using an earlier version of DB2, you must resize your tablespaces manually.

## 4.0 Fixes Included in Each Release

This section lists the latest fix level that has been included in each release for each product component. A release is listed in this section only if changes occurred in that release. Go to the Knowledge Center on the [Empower website](#) for detailed information about fixes.

### ***Release 9.9***

- DC\_8.2\_SP2\_DBS\_Fix12
- DC\_9.6\_DBS\_Fix6
- DC\_9.7\_DBS\_Fix5
- DC\_9.8\_DBS\_Fix2

### ***Release 9.8***

- DC\_9.6\_DBS\_Fix4
- DC\_9.0\_SP1\_DBS\_Fix5
- DC\_8.2\_SP2\_DBS\_Fix11

### ***Release 9.7***

- DC\_9.6\_DBS\_Fix2
- DC\_9.5\_SP1\_DBS\_Fix4
- DC\_9.5\_SP1\_DCC\_Fix1
- DC\_9.0\_SP1\_DBS\_Fix4
- DC\_8.2\_SP2\_DBS\_Fix10

### ***Release 9.6***

- DC\_9.5\_SP1\_DBS\_Fix1
- DC\_9.0\_SP1\_DCC\_Fix1
- DC\_9.0\_SP1\_DBS\_Fix2
- DC\_8.2\_SP2\_DBS\_Fix8

## Release 9.5

- DC\_9.0\_SP1\_DBS\_Fix1
- DC\_8.2\_SP2\_DBS\_Fix7

## 5.0 Other Resolved Issues

This section lists the issues that were resolved in each release but were not part of the fixes listed in the previous section. A release is listed in this section only if changes occurred in that release.

### Release 9.8

- WDA-768  
Database Component Configurator does not work with SSO/NTLM authentication when it is installed on Microsoft Windows.  
When you try to use the Authentication Method as NTLM to establish a connection to Microsoft SQL Server, Database Component Configurator fails with the following exception:  
*Authentication was requested but the required DDJDBCx64Auth05.dll was not found on the path specified by the java.library.path system property.*  
Workaround: Add the following statement in the setEnv.bat file available at  
<Install\_Dir>\common\db\bin:  
set SSO=<Install\_Dir>\common\bin  
set JAVA\_OPTS=%JAVA\_OPTS% -Djava.library.path="%SSO%"  
where <Install\_Dir> is the installation directory.

### Release 9.5

- WDA-317  
Database component upgrades from 7.1.2.0 to 8.0.1.0 fail.  
If you try to migrate database components using a PRODUCT option, for example, PRODUCT - Optimize, you receive the error "Optimize 7.1.2.0 not installed. Migration path may be wrong."  
The workaround is to migrate individual database components. For instructions, see the webMethods Upgrade Guide. Do not use the PRODUCT options to migrate database components.
- WDA-693  
The Database Component Configurator issues a NullPointerException when importing the configurations through the command line interface (CLI) on Linux/Unix.  
The Database Component Configurator does not store passwords in exported configurations file, and while importing the configurations file, DCC issues a NullPointerException when it encounters a null value for the password.  
This issue is resolved.

## **6.0 Documentation Changes**

This section describes significant changes to the documentation, such as the addition, relocation, or removal of product guides, online help, chapters, or other major content. A release is listed in this section only if changes occurred in that release.

## **7.0 Terminology Changes**

A release is listed in this section only if changes occurred in that release.

## **8.0 Added, Removed, Deprecated, or Changed Items**

This section lists features, functionality, controls, portlets, properties, or other items that have been added, removed, deprecated, or changed. A release is listed in this section only if changes occurred in that release.

## **9.0 Added, Removed, Deprecated, or Changed Built-In Services**

A release is listed in this section only if changes occurred in that release.

## **10.0 Added, Removed, Deprecated, or Changed Parameters**

A release is listed in this section only if changes occurred in that release.

## **11.0 Added, Removed, Deprecated, or Changed APIs**

A release is listed in this section only if changes occurred in that release.
